Banjarmasin, South Kalimantan

PROFILE

Fresh graduate in Computer Science with 3+ years of real-world experience across government IT systems, procurement, and administrative operations. A self-driven generalist who picks up new skills quickly and thrives in cross-functional environments. Comfortable working with both technical teams and non-technical stakeholders. Eager to grow, contribute, and take on challenges beyond a single job description.

WORK EXPERIENCE

Professional Staff · Disbudporapar Kota Banjarmasin 2024 – Present

Department of Culture, Youth, Sports & Tourism — City of Banjarmasin

- Managed and maintained the department's administrative information systems, ensuring data accuracy and system uptime across the institution.
- Led digitization of paper-based historical archives into structured digital formats, significantly improving long-term record accessibility.
- Served as procurement officer for 5–10 city-scale official events, overseeing vendor selection and coordination to ensure timely, compliant delivery.
- Acted as event coordinator and person-in-charge, managing end-to-end execution of departmental public events.
- Maintained departmental data workflows and supported day-to-day public administration operations.

Programming Intern · LPFK — Medical Device Safety Center 2022

- Performed structured debugging and QA on medical device software in a safety-critical environment.
- Documented test results and defects in structured written reports, applying strict accuracy standards.
- Contributed to research on software modification for medical calibration equipment.

Programming Intern · UD. Borneo Ban 2020

- Built a full Point-of-Sale (POS) and inventory management app from scratch using Java and PHP — deployed and used in daily operations.
- Designed a MySQL database covering inventory tracking, sales reporting, and customer records.

EDUCATION

S.Kom — Bachelor of Computer Science · Universitas Lambung Mangkurat (ULM)

AREA OF INTEREST

I have a strong interest in automation systems and how technology can streamline repetitive processes to improve efficiency and accuracy. I enjoy exploring ways to automate data workflows, administrative processes, and system operations — which aligns naturally with my background in building and maintaining information systems in a government environment.

ADDITIONAL

- Languages: Native Bahasa Indonesia · Professional English
- Familiar with government procurement procedures and institutional compliance requirements.
- Open to relocation anywhere in Indonesia. Available to start immediately.
