PROFESSIONAL SUMMARY

Detail-oriented Operations & Data Specialist holding a Bachelor's degree in Computer Science from Universitas Lambung Mangkurat. Proven track record in operational inventory recording, high-accuracy field data verification with BPS (Central Bureau of Statistics), and public sector administrative management. Skilled in Microsoft Office applications, spreadsheet reporting, and digital data entry systems under strict Standard Operating Procedures (SOP). Strong communicator experienced in multi-stakeholder coordination, prepared to execute shift-based operational support, stock tracking, and daily reconciliation reporting for site operations at PT Elnusa Petrofin.

CORE COMPETENCIES

- Operational Data Entry & Reconciliation
- Inventory & Stock Tracking Management
- Field Data Verification & CAPI System Operation
- Administrative Reporting & Documentation
- SOP Compliance & Process Accuracy
- Microsoft Office (Word, Excel, PowerPoint) – Certified
- Stakeholder Coordination & Field Team Communication
- Fluent English & Bahasa Indonesia Communication

WORK EXPERIENCE

Operational & Administrative Staff / Museum Educator

May 2025 – Present

Department of Culture, Youth, Sports, and Tourism (Disbudporapar Kota Banjarmasin)

- Administered daily operational logs, official correspondence, and administrative documentation following local government SOPs.
- Managed spatial layout planning, logistics preparation, and technical administration for municipal cultural events and site exhibitions.
- Handled public inquiries, operational visitor guiding, and stakeholder feedback to support smooth daily site activities.
- Coordinated with external agencies and local community representatives to ensure seamless execution of official programs.

Field Statistics Partner (PPL – 2026 Economic Census)

May 2026 – August 2026

Badan Pusat Statistik (BPS)

- Conducted field data collection and business mapping across designated operational zones under tight daily completion targets.
- Input, verified, and reconciled field statistics using CAPI (Computer-Assisted Personal Interviewing) mobile applications with zero-error standards.
- Performed direct interviews with business owners and site leaders to validate socio-economic data accuracy.
- Resolved data entry discrepancies on-site through systematic cross-checking and structured reporting.

Point-of-Sale & Inventory Systems Administrator

January 2020 – December 2020

UD. Borneo Ban

- Recorded and monitored daily inventory movements, including incoming stock, outgoing spare parts, and stock availability logs.
- Executed monthly inventory data reconciliation to ensure zero discrepancy between physical stock and system records.
- Standardized basic transaction data entry procedures to support efficient supply chain tracking.

Software Quality Assurance & Testing Intern

January 2022 – March 2022

LPFK (Loka Pengamanan Fasilitas Kesehatan)

- Executed systematic debugging and functional software testing for medical equipment calibration tracking systems.
- Documented testing steps, bug reports, and operational workflows to ensure software compliance with technical standards.

EDUCATION

Bachelor of Computer Science (S1 Ilmu Komputer)

Graduation: August 2026

Universitas Lambung Mangkurat, South Kalimantan, Indonesia

- Relevant Coursework: Database Systems, Information Systems, Software Engineering, Data Structures, and Applied Logic.

CERTIFICATIONS & ACHIEVEMENTS

- Certified Microsoft Junior Office Specialist
- 2nd Place Winner – National Online English Public Speaking Competition (Briton English Education)
